

DATA CLEANING AND WRANGLING

- Data from Inside Airbnb (Seattle listings)
- Dropped irrelevant or low information fields
- Cleaned price field (removed symbols and converted to numeric)
- Removed rows with missing price
- Trimmed top 1% of prices to reduce outliers
- Restrict to comparable short-term listings (min. nights ≤ 7 & accommodation ≥ 2)

NEIGHBORHOOD GROUP PRICING

Neighborhoods cluster around central Seattle and downtown command the highest prices.

PROPERTY TYPE CHARACTERISTICS

- Entire homes command significantly higher prices than private rooms
- Larger listings that accommodate more guests also command higher prices
- Together, property type and size are key drivers of pricing differences
